Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 December 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II in the reply filed on December 20, 2004 is acknowledged. Therefore, the non-elected invention comprised of claims 1-5 is withdrawn from consideration and the restriction is made FINAL.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brandt et al.

Brandt et al. disclose a method including the steps of providing a chlorinated feed water (10) to an antiscala device (14) prior to filtering the feed water in an inherently chlorine tolerant filter (28) having a nominal pore size of less than 0.1 microns (22) and distilling the filtrate (28). Brandt et al. fail to disclose providing antiscala treatment to the filtrate prior to distilling the water.

It is submitted that it is well within the purview of the skilled artisan provide antiscala treatment of filtered feed water prior to distillation in order to avoid fouling of a distillation unit. Accordingly, it is submitted that it would have been obvious for the skilled artisan to have modified the teachings of Brandt et al. such that it includes

Art Unit: 1724

providing antiscaling treatment of filtered feed water prior to distilling the feed water in order to avoid fouling of a distillation unit. Further, it is noted that the record does not show, e.g., by comparative test data, that applicant is able to obtain any new or unexpected result derived from providing antiscaling treatment of the feed water after filtering vis-à-vis before filtering. Absent such a showing, the placement of the antiscaling device is deemed to be an obvious matter of choice in design, insufficient to patentably distinguish the claims over the prior art.

Regarding the preamble reciting that the method is for producing USP purified water or water for WFI, it is submitted that as the preamble fails to breathe life and meaning into the claim, the claim does not rely on the preamble for completeness, and the limitations of the preamble are not recited in the claim, the preamble is not given patentable weight in the claim.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of the art.
